NPIC Project J-261/63

An elongated object has been sighted on what appears to be a rail car on a siding at Perm Armament Plant Motovilikha Molotov 172. The object is approximately 110 by 15 feet in size and one end of it is tapered to a

point. (The width cannot be measured accurately because of the halation.) It is possible that the object is a missile or airframe covered with canvas. [REDACTED]
